Answer

1 K^{th} Largest number:

```
int n = sc.nextInt();
int a[] = new int[n];

for (int i = 0; i < n; i++) {
    a[i] = sc.nextInt();
}

int k = sc.nextInt();

int max = Integer.MIN_VALUE;
int p = 0;

while (k > 0) {
    max = Integer.MIN_VALUE;
    for (int i = 0; i < n; i++) {
        if (a[i] > max) {
            max = a[i];
            p = i;
        }
    }
    a[p] = Integer.MIN_VALUE;
    k--;
}

System.out.println(max);
```
